

Network latency check

```
#!/bin/bash

servers=(8.8.8.8 127.0.0.1)

threshold=100

for i in "${servers[@]}"
do

    ping_latency=$(ping -c 1 "$i" | grep 'time=' | awk 'BEGIN{ FS="time=" } {print $2}' | awk '{print $1}')

    if [ "$ping_latency" -gt "$threshold" ]
    then
        echo "Hight latency in server \"$i\" with time = \"$ping_latency\" "
    else
        echo "Normal latency in server \"$i\" with time = \"$ping_latency\""
    fi
done
```

```
[root@dev adhamscripts]# vim net_latency_chk.sh
[root@dev adhamscripts]# chmod +x net_latency_chk.sh
[root@dev adhamscripts]# ./net_latency_chk.sh
./net_latency_chk.sh: line 12: [: 44.0: integer expression expected
Normal latency in server 8.8.8.8 with time = 44.0
./net_latency_chk.sh: line 12: [: 0.457: integer expression expected
Normal latency in server 127.0.0.1 with time = 0.457
[root@dev adhamscripts]#
```

Explain:

```
ping_latency=$(ping -c 1 "$i" | grep 'time=' | awk 'BEGIN{ FS="time=" } {print $2}' | awk '{print $1}')
```

```
[root@dev adhamscripts]# ping -c 1 8.8.8.8
PING 8.8.8.8 (8.8.8.8) 56(84) bytes of data.
64 bytes from 8.8.8.8: icmp_seq=1 ttl=128 time=49.3 ms
--- 8.8.8.8 ping statistics ---
1 packets transmitted, 1 received, 0% packet loss, time 0ms
rtt min/avg/max/mdev = 49.289/49.289/49.289/0.000 ms
```
